

OCLC Services/Products Utilization of WorldCat® Registry Data

Introduction

The following chart illustrates what WorldCat® Registry data is automatically utilized by other OCLC services and products. For further information about an OCLC product or service, please click the product/service name at the top of the column.

WorldCat Registry data does not impact your library's status with OCLC, nor is it the only source of data for the products and services listed. It is rather intended to be freely-shared, centralized metadata about your location, and details which can be utilized by everyone in the library community. For more details on each field, please see the [WorldCat Registry Data Fields Quick Reference](#).

Note: All products listed below require that a library has a WorldCat Registry ID and OCLC Symbol.
