Promotion of cooperative collection management

- Create a core collection for each title
- Every library becomes a repository in the network
- « One title, one disciplinary field » (eg. Biology & philosophy, journal of medicine and philosophy)
- Working groups with researchers for each disciplinary field
- No incidence on acquisition policy
- Financial support
- The ownership of the holdings is not shared
Main objectives in the future

• Widen journals shared preservation programs to other subject fields
• Develop shared preservation programs on doctoral dissertations
• Continue participation into the European Print Initiatives Collaboration program (EPICo)
