Recommended actions

For this release, we recommend that you review the following checklist and complete the relevant tasks so that you can adjust your policies and workflows and train your staff. This checklist identifies updates that we have determined as significant for most institutions. We encourage you to review all the items in the release notes to determine whether there are items that might require additional action or follow up by your institution.

These items require immediate actions or decisions.

Bug fixes

- In the Policies Directory, the Shipping Address is no longer missing from the Profile tab for some institutions.
- Responding to a lending request with IFM selected and the Lending Charge amount blank no longer triggers an error.
- The value of Patron Status is no longer overwritten when Constant Data with a blank value for Status is applied.

Known issues

Coming soon

Automatically update request with URL and password after scanning the document

Today many scanners allow you to scan a file to email, to a file, or to Article Exchange. With this enhancement, Article Exchange will update the WorldShare ILL request with the URL and password if you have also scanned in the Request ID.

Testing with a variety of scanning vendors and software is underway. A list of supported scanners will be provided as this testing progresses, and additional details will be available in the WorldShare ILL documentation:

Future releases

The following enhancements are also planned for upcoming releases:

- See complete citation information while selecting lenders
- Print all requests in a queue
