

New and Changed Entries January 2009

The following selected new and changed entries are effective on January 1. The most significant changes involve revisions in 025.4, where we have provided specific notation for abstracting, general subject cataloging and indexing schemes in specific languages, subject cataloging and indexing based on natural language, and, under that, tagging. Changes to schedule numbers are indicated only by underlining. Other changes are underlined, and deletions are marked by strikethroughs. Schedule entries without underlining or strikethroughs are old entries that are included for context. Please consult WebDewey for complete access to all updates to DDC 22, and Abridged WebDewey for complete access to all updates to Abridged Edition 14.
