

WorldCat Registry: Where Your Data Goes

The WorldCat Registry gives your library or cultural organization a single place to keep track of all your details, such as geographic location, catalog, OpenURL, IP ranges and more. But where does this data get surfaced for the end-user, developer and librarian? The visual below gives you a snapshot:

Developer Tools through OCLC Web Services/ Service Configuration for WorldCat Local

- WorldCat Registry Search (Web service)**
Use this Web service to find and retrieve institutions and profiles in the WorldCat Registry based on specified criteria.
Registry Search API
- WorldCat Registry Detail (Web service)**
Use this Web service to retrieve information about a single institution or consortium from its profile in the WorldCat Registry.
Registry Detail API
- OpenURL Gateway (Web service)**
Direct your Web users to full text and other online resources at the address.
Open URL Gateway
- OCLC Service Configuration**
Configure your WorldCat Local services.
