

NetLibrary® and Useful Utilities have partnered to deliver improved user experience plus administrative cost savings. NetLibrary integrated with EZproxy™ authentication software enables your library to provide secure user access to your NetLibrary eContent in a single sign-on environment using existing library credentials.

Libraries already using EZproxy will benefit from a single point of administration for user authentication across all licensed eResources including NetLibrary.

EZproxy Single Sign-on

EZproxy software is a simple and effective authentication solution for your library to deliver secure user access to your electronic resources. With the release of version 4.0h, EZproxy can perform single sign-on to NetLibrary eContent using existing library-issued credentials, such as a library card or PIN.

By serving as an intermediary between your library's user database and NetLibrary eContent, EZproxy Single Sign-on eliminates the requirement for separate NetLibrary user accounts.

Whether searching from your library's Web site, OPAC or library eResources page, your users will enjoy seamless access to your NetLibrary eContent from the point of request.

My library already uses EZproxy. How do I enable Single Sign-on?

Implementation is fast, simple and free.

First, upgrade to the latest release of EZproxy software, v4.0h GA (2007-07-11). It's free to all libraries currently using EZproxy. For more information and to download, visit

www.usefulutilities.com/support/db/netlibrary.html

Next, implement EZproxy Single Sign-on for your NetLibrary eContent in minutes using the configuration tools located in the administration console of the Library Resource Center. Easy-to-follow instructions are available as a downloadable PDF at

www.oclc.org/netlibrary/authentication/ezproxy

My library does not use EZproxy. Where can I find more information?

EZproxy is a cost-effective solution implemented by libraries worldwide. More information about EZproxy authentication software is available from Useful Utilities at www.usefulutilities.com

Key Benefits

- Single sign-on authentication for local and remote users
- Improved user access to NetLibrary eContent
- Minimal library staff administration
- Self-service tools within the Library Resource Center
- Real-time, simple configuration
- No additional cost for current EZproxy users

NetLibrary Authentication Options

NetLibrary supports several methods to manage user authentication including:

- IP Address Recognition
- Proxy Server
- Secure Referring URL
