

Syndetic Solutions content in WorldCat Local

More evaluative content to inform users' research

OCLC and Syndetic Solutions are partnering to offer access to evaluative content including cover art, reviews and summaries in WorldCat Local. When enabled, this content helps WorldCat Local users more easily determine which items in search results fulfill their research needs.

All WorldCat Local libraries in North America (Canada, US, Mexico), Central America, Caribbean, and South America may choose to purchase this content through OCLC or display content they purchase directly from Syndetic Solutions or another content provider on their WorldCat Local site.

Staff members at libraries with active Syndetic Solutions subscriptions control the timing of enabling access to this content on their WorldCat Local sites. To make this content visible to your users, log on to your library's profile in the "Optional Content Display" > "Syndetic Solutions Enrichment Content" section of "My Worldcat.org" in OCLC Service Configuration at <http://worldcat.org/config>. Once you set the "Display Syndetics data" to "Show" the content will begin to display to users.
