Simple Stanza Creation

Andrew Senior
McGill University
Directives and Stanzas

Title (T)
URL (U)
Host (H)
HostJavascript (HJ)
Domain (D)
DomainJavascript (DJ)
Directives and Stanzas

**Title** Acta horticulturae

**URL** http://www.actahort.org

**Domain** actahort.org

Starting point URL:

After processing, EZproxy rewrites URL:
Adding a New Stanza

**Title**

**URL**

**Domain**

- Start with this combination
- BUT click on a few links within the site and look at URL behaviour
- In this example, only path ending changes

http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc

http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/login

http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/search

http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/issue/archive
Title (T)

**Title** Canadian Journal of Counselling and Psychotherapy/
Rvue canadienne de counseling et de psychothérapie

**URL**

**Domain**

- Title information is for humans
- Can include extra info such as former titles or parallel titles if helpful
- Titles must be on one line!
- If adding an extra line with other information, must use pound/hashtag (#) symbol
  
  #Rvue canadienne de counseling et de psychothérapie
- Title information will appear in Ezproxy menu page
Title Canadian Journal of Counselling and Psychotherapy
URL http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc

Domain

• Target URLs typically the homepage or top-level URL of resource
• Must retain http:// or https://
• Pay attention to whether http or https
• See https://www.oclc.org/support/services/ezproxy/documentation CFG/spu-and-cfg.en.html for detailed info!
Domain (D)

**Title** Canadian Journal of Counselling and Psychotherapy

**URL** http://cjc-rcc.ucalgary.ca

**Domain** cjc-rcc.ucalgary.ca

- Element which follows the http:// part of the URL up to top-level (.ca, .org, .com)
- Directive does not retain http:// or https://
- Be mindful of over-reducing a domain
  - Usually give www.somewebsite.com as somewebsite.com
  - However, ucalgary.ca = entire University of Calgary website, proxying whole university probably not necessary for this resource which is self-contained
Domain (D)

**Title** Canadian Journal of Counselling and Psychotherapy  
**URL** http://cjc-rcc.ucalgary.ca  
**Domain** cjc-rcc.ucalgary.ca

**Chrome:** http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/issue/archive  
**FireFox:** http://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/index
DomainJavascript (DJ)

• If the site uses JavaScript, you will need to make Domain into DJ

• For example, if the login button uses JavaScript to display a form to fill in https://cjc-rcc.ucalgary.ca/cjc/index.php/rcc/login a DJ directive must be included to handle the JavaScript processing

Title Canadian Journal of Counselling
URL http://cjc-rcc.ucalgary.ca
DJ cjc-rcc.ucalgary.ca
Host (H)

• Many journal databases make new hostnames for each journal title rather than add to the URL path

  *Progress in Human Geography*
  
  http://phg.sagepub.com/ (not http://sagepub.com/phg)

• Remember, EZproxy is looking for a match against a URL or Host directive

<table>
<thead>
<tr>
<th>Title</th>
<th>Sage Publications</th>
</tr>
</thead>
<tbody>
<tr>
<td>URL</td>
<td><a href="http://online.sagepub.com">http://online.sagepub.com</a></td>
</tr>
<tr>
<td>DJ</td>
<td>sagepub.com</td>
</tr>
</tbody>
</table>

No entry for phg.sagepub.com!
Host (H) and HostJavascript (HJ)

• If starting point URL in catalogue has https://
  

  
  **Title** Sage Publications  
  **URL** http://online.sagepub.com  
  **HJ** https://phg.sagepub.com  
  **DJ** sagepub.com
Thank you!
