OCLC AMERICAS
REGIONAL COUNCIL
MEETING

Hello.

I'm the **Smarter** Library.

Greasing the Wheels of Collection Management

BRIAN RENNICK AND CURTIS THACKER, BRIGHAM YOUNG UNIVERSITY

Why is Library IT trying to
get rid of all the books?

Building Stats

- Multiple building additions (1961-2000)
- 665,000 square feet
- 4.7 million volumes
- 98 miles of shelving
- 10,000 daily gate count

Building Remodel

- Plan from consultants accepted in January of 2017
- Easier navigation
- Consistency between floors
- Replace some bookshelves with user spaces

Concerns From Librarians

- Interdisciplinary and area studies overlap
- Document why a book was deselected
- Document how well a program is supported
- Input from campus faculty

GreenGlass®

- Experiment with deselection scenarios
- Filter print monographs by age and amount of use
- Check for overlap with peer libraries
- Export deselection lists to Excel

HathiTrust In Copyright

Starting with Science & Engineering

- Auxiliary storage
- Deselection
- Moving 30-40% of the collection
- 5,000 books per week for 28 weeks = 140,000 books

Touch Once

- Stickers distinguish destination
- Five librarians working in parallel
- Same general physical area
- Backfill shelves
- Special shelves for physical review

Deselection Tool

- Deselection facet in search tool
- Use additional filtering
- Subject headings can identify interdisciplinary/area studies
- Ability to cancel deselection of a book
