• American University of Sharjah (AUS) is located in the United Arab Emirates
• Migrated to WorldShare Management Services (WMS) in 2016

• Our collection includes:
  • LibGuides:
    • 124 guides
  • Institutional Repository:
    • 550+ Masters Theses
    • 150+ Faculty Publications
    • Student Projects
Contents

• Why?
• How?
• Results!
Why integrate your Institutional Repository & LibGuides with WorldCat?
Why integrate your IR & LibGuides with WorldCat

1. These items are a part of your library collection. They should be in your catalog.
2. Share unique collections with the world.
3. It’s an automated process.
4. It’s free!
How to do it

1. Find the right OAI-PMH tool
2. Set up the Digital Collection Gateway
3. Edit the Metadata Map
1. Find the right OAI-PMH Tool

- OAI-PMH = Open Archives Initiative Protocol for Metadata Harvesting

- LibGuides, Dspace, and other repository software have OAI-PMH tools
  - They can export the metadata in XML format via HTTP
  - This allows a harvester to get the metadata.
LibGuides OAI-PMH Export Tool

Harvest and add LibGuides metadata to your third-party application using the OAI-PMH protocol. For more information on OAI-PMH, see [http://www.openarchives.org/OAI/2.0/](http://www.openarchives.org/OAI/2.0/).

LibGuides supports the standard oai_dc metadata format. Use your base URL (shown above) along with the 6 standard OAI-PMH requests to retrieve metadata from your public.

Find the right OAI-PMH Tool

Resources:

• LibGuides: https://blog.springshare.com/2015/07/21/new-in-libguides-oai-pmh-support/

• Dspace: https://wiki.duraspace.org/display/DSDOC5x/OAI

• CONTENTdm: https://help.oclc.org/Metadata_Services/CONTENTdm/CONTENTdm_Administration/Server_Administration/020Harvesting
Our case is a bit more complicated. We don’t want to harvest everything in our DSpace repository.

Dsppsce OAI-PMH support doesn’t allow to select certain parts of your repository to harvest (as far as we know).

Therefore, we use a Java web application called jOAI to set up our harvest.

- Select which collections to harvest and which to ignore.
- Sponsored by the National Science Digital Library (NSDL)
# jOAI user interface

**Harvester Setup and Status**

**Setup**

Add a harvest to get metadata XML files from OAI data providers. If only providing metadata files, harvester set up is not necessary.

- Add new harvest: Create a harvest to get files and to specify when and where the harvest is performed.

**Status**

View harvest history and progress.

View a listing of all past harvests performed, current harvests in progress, and their details.

The current state of female leadership in the United Arab Emirates

Abstract

Purpose: To research the state of affairs in the United Arab Emirates (UAE) for the presence (or absence) of women in senior business leadership positions, and to investigate where they are located within organizations (e.g., board members, chief officers, vice presidents, top management, division or unit heads).

Design/methodology/approach: This is a quantitative gender analysis of 964 organizations, based on data available from the Zawyad database that tracks information about public and private companies in the Middle East and North Africa (MENA) region.

Findings: Women are still underrepresented in senior company and top department leadership positions; however, they are found slightly (but not significantly) more in departmental leadership, pseudo services and hospitality industries, and in smaller and public companies. Research limitations: The database utilized did not contain completed company data, specifically, any response variable; hence, the study was descriptive in nature and lacked advanced statistical techniques for comparison and relationship analysis. Practical implications: This study provides helpful insights for government leaders, educators, and scholars who work to help prepare women for leadership in this region. For business practitioners, the presence and development of female business leaders extends choice and increases value in the human resource pool. Social implications: The authors believe that it is important that UAE females take up roles in both the public and private sector so they can become more effective role models to a new generation of female workers. Originality/value: This is one of the first scholarly studies conducted on the presence of women leaders in various sectors within the UAE.
