

Relocations and Discontinuations

The following two lists show all the relocations and discontinuations since Edition 21.

The column headed *Edition 21* indicates in numerical order each number in that edition from which a topic or group of topics has been shifted; the column headed *Edition 22* indicates each corresponding number in the present edition to which those topics or groups of topics have been shifted. If two or more topics have been shifted from one number to two or more numbers, each separate shift is shown.

Numbers in the *Edition 21* column enclosed in square brackets are no longer in use; those not enclosed in brackets have lost part of their original meaning through relocation or discontinuation, but still retain some of their meaning.

In the following lists, the same abbreviations employed in the Relative Index are used for Tables 1–6, e.g., T1 means Table 1 Standard Subdivisions.

Relocations

In a relocation, one or more topics are shifted to a number differing from the old in respects other than length. If the relocation is partial, the original number remains valid; but if it is total, the original number is no longer used. Relocations are described and explained in the Introduction.

Relocations that have appeared previously in an interim update prior to the publication of Edition 22 are indicated by * next to the Edition 21 number. Relocations that eliminate dual provision for the same topic or topics are indicated by † next to the Edition 21 number.

For example, in Table 2 one of the topics that was in —16533 in Edition 21 has been relocated to —6215 in Edition 22; all of the topics in —4112 have been relocated to —4113. All the topics in —4434 have been relocated to —4436 to eliminate dual provision.

“Scattered within 543” means that the topic has been relocated to so many numbers throughout 543.1–543.8 that it is not feasible to name them all.

An indented number is an element of an add table. The number or span under which it is indented shows the location of the add table or the add instruction related to an add table. For example, the [09] and 009 under 299.683–.685 indicate that the [09] and 009 are elements of the add table at 299.683–.685.

Table 7 Groups of Persons has been deleted and replaced by direct use of notation already available in the schedules and in notation 08 from Table 1. Relocations resulting from this deletion and replacement are not given. The following list gives the numbers with add instructions where notation from Table 7 was previously added:

T1—024	305.908
T1—088001–088999	305.909
T2—1762–1769	305.91–.99
T3C—352	390.4
T3C—9205–9207	781.711–.719
T3C—921	781.74–.79
174.9	782.3221–.3229
303.388	782.34–.39
305.43	
305.6	

For details of the specific relocated topics the classifier should consult the appropriate entries in the tables and schedules.

Discontinuations

A discontinuation is the result of shifting one or more topics to a number shorter than the previous one but otherwise not differing from it. If all topics in a given number are thus shifted, the number is no longer valid. Discontinuations are described and explained in the Introduction.

In addition, several numbers have been dropped because their content in Edition 21 was meaningless within the context of Edition 22.

Discontinuations that have appeared previously in an interim update prior to the publication of Edition 22 are indicated by * next to the Edition 21 number.

“Main number” means that the provision for the topic within a table has been discontinued to the numbers to which the table number would previously have been added.

For example in Table 2, —[41223] has been discontinued and all of its contents moved up to the broader number —4122, while only some of the topics in —41425 have been moved up to —4142. In Table 5, —[03] has been discontinued because it is without meaning.

An indented number is an element of an add table. The number or span under which it is indented shows the location of the add table. For example, [64–65] and 6 under 546 indicate that [64–65] and 6 are elements of the add table at 546.

Table 7 Groups of Persons has been deleted and replaced by direct use of notation already available in the schedules and in notation 08 from Table 1. Discontinuations resulting from this deletion and replacement are not given. The list giving the add instructions where notation from Table 7 was previously added is located in the introduction to list of relocations.

For details of the specific discontinued topics the classifier should consult the appropriate entries in the tables and schedules.

Reused Numbers

A reused number is a number with a total change in meaning from one edition to another. The list of reused numbers shows all Edition 21 numbers immediately reused in Edition 22 with the exception of reused numbers resulting from the deletion and replacement of Table 7 Groups of Persons. The list giving the add instructions where notation from Table 7 was previously used is located in the introduction to the list of relocations.
