Evolving technologies:
Tips for classifying

• Expect surprises!
  • Never use an old number without checking it
  • The whole topic—or a specific aspect of the topic—might have been moved to a different number

• In addition to the old number, also check:
  • Relative Index
  • Notes in the schedule, including notes in the upward hierarchy
  • Manual notes
Use of this number for comprehensive works on digital photography discontinued; class in 770

Preparation and manipulation of photographic digital images relocated to 771.44
Standard subdivisions are added for photography, computer art, cinematography, videography together; for photography alone

Class here conventional photography (photography using film), digital photography

Relative Index:

Groups of people:
Tips for classifying complex works

- Provisions for groups of people:
  - T1–08 Groups of people
  - Table 5. Ethnic and National Groups
  - Provisions for groups of people in schedules, e.g., 305 & 362
- Provisions for topics in schedules, e.g., migration
- Citation order / preference order
The order in which two or more characteristics (facets) of a class are to be combined in number building. When number building is not permitted or possible, instructions on preference order with respect to the choice of facets are provided. (from Glossary)
Preference order

The order indicating which one of two or more numbers is to be chosen when different characteristics of a subject cannot be shown in full by number building. A note (sometimes containing a table of preference) indicates which characteristic is to be selected for works covering more than one characteristic. When a notation can be synthesized to show two or more characteristics, it is a matter of citation order. (from Glossary)
