

DCG v2.10 SLA Release - Release Notes

NEW FEATURES	Reference(s)
<p>Users can set-up e-mail notifications for harvests. This allows a user to be notified 1) when a scheduled harvest has been added to the harvest queue, 2) when a scheduled harvest is at the top of the queue and is beginning to run, and 3) when a scheduled harvest has completed. If notifications are turned on the Gateway also sends an e-mail if there are any problems successfully completing a harvest.</p>	<p>DCG-1215, DCG-1216, DCG-1221, DCG-1222, DCG-1224, DCG-1225</p>
<p>Gateway asks users to confirm the holdings symbol settings. This allows users to verify that the 3 or 5 character holdings symbol they've entered is the correct symbol for their institution.</p>	<p>DCG-979</p>
<p>Gateway has a new, more efficient mechanism for managing harvest schedules between sites. The new scheduling mechanism improves the ability of the Gateway to process a harvest closer to its scheduled date even when the system load is high.</p>	<p>DCG-1202, DCG-967, DCG-901, DCG-1207, DCG-1198</p>
<p>Gateway now puts priority on harvests started with the Sync with WorldCat Now button. This new feature pushes an ad-hoc synchronization request to the front of the harvest queue so you get the fastest result possible.</p>	<p>DCG-1196, DCG-1203</p>
<p>There is improved error handling to identify and retry repositories that cannot be reached at the time of a scheduled harvest. After multiple retries, the Gateway can now remove defunct repositories from the harvest queue to reduce processing needs for all harvests. The improved error handling also allows notifications to be sent to Gateway administrators so they can either repair or remove repositories that cannot be harvested.</p>	<p>DCG-1186, DCG-1006</p>
<p>The MARC 502, Dissertation Note, field has been added in both its forms to the Show Unmapped Fields selection under the More menu in the Edit Metadata Map page.</p>	<p>DCG-1228</p>
BUG FIXES	
<p>The "Register your institution ..." section of the main registration page (http://worldcat.org/digitalcollectiongateway/register.jsp) for the Gateway has been fixed. Users can request new accounts with the Gateway without having to supply an OCLC symbol. There are improved help fields on the registration page.</p>	<p>DCG-1217</p>
<p>The "Add a User ..." section of the main registration page (http://worldcat.org/digitalcollectiongateway/register.jsp) for the Gateway has been fixed. Users can add themselves to your account if you provide them with your KEY. When the Add User button is selected an e-mail is sent to the user to show them that their user name has been associated with a particular organization's account in the Gateway. Also, there are improved help fields on the registration page to assist users understanding what they're entering and why.</p>	<p>DCG-1217</p>
<p>The special registration page in the Gateway for CONTENTdm users has been fixed. The Gateway is now able to complete CONTENTdm registration by returning the OCLC Symbol the user enters back to CONTENTdm. There are improved help fields on the registration page to assist users understanding what they're entering and why.</p>	<p>DCG-1217</p>
<p>The Gateway will disable harvests for Active collections that no longer appear in the repository.</p>	<p>DCG-785</p>
<p>The Gateway recognizes and reports errors for multiple simultaneous harvests of a single collection in a repository.</p>	<p>DCG-1076</p>
<p>The Gateway uses the value "0" for holdings identification. This allows batch updates to proceed with the proper assumptions when scanning WorldCat.</p>	<p>DCG-1185</p>
<p>The Gateway's monthly reports to users now reflect the proper current month's date in the report.</p>	<p>DCG-1190</p>
<p>The Gateway reports system errors when the Validation Service times out.</p>	<p>DCG-1220</p>
