Partnership to serve academic libraries

- Offer WMS libraries the leading resource list management solution
- Help libraries support faculty, better serve students, and demonstrate value
WorldCat knowledge base: Re-architecture

- **Greatly improved speed** updating new KB content from providers; makes the titles, holdings and MARC records **available within 72 hours of receipt** from the publishers.

- **New model for collection editing:** Improved ability for libraries to cooperatively improve the quality of KB collections and share with the entire community.

- **Greater transparency in the Activity History**, showing when collections were changed and by what organization/process (provider update, library change, etc.)… and **expanded to include WorldCat cataloging partner collections**.

Make more ‘e’ and OA content available to users more quickly
