- **MAPS**: 6 million
- **DIGITAL CONTENT ITEMS**: 81 million

Building partnerships on behalf of libraries

Every member benefits from the combined purchasing and licensing power of the cooperative. Working together, our members are able to provide better service for library users everywhere.

OCLC works with more than 370 publishers and content partners from around the world to increase the volume of materials that member libraries can share with users. These relationships let WorldCat Discovery libraries provide access to content and collections from publishers, content from e-book aggregators, large mass-digitization collections, and content partner records that are made available through WorldCat.

See the full list of searchable e-content collections: [oc.lc/indexDiscovery](oc.lc/indexDiscovery).
