

OCLC Cataloging and Metadata Subscription

Advance the world's
library collections through

collaboration.

An **OCLC Cataloging and Metadata Subscription** delivers the tools you need to expand your library's impact by registering your collections in WorldCat. Increase efficiency through automated processes and contribute new, quality WorldCat records for your unique material.

The world's metadata experts, working together

OCLC represents a network of thousands of libraries working together at a scale unmatched in the global library community.

We work alongside library metadata specialists to build up, maintain, and enrich WorldCat, the data at the heart of the OCLC network.

Your OCLC Cataloging and Metadata Subscription offers unique value.

THE SCALE OF WORLDCAT

Only WorldCat marshals the collective expertise of thousands of library, partner, and OCLC staff members, who together add a new record to WorldCat every second and continuously improve records for the benefit of the whole community. No other organization offers the breadth of library data and opportunity for collaboration that we deliver with WorldCat and the OCLC Cataloging and Metadata Subscription.

With more than 600 million records available for copy cataloging in more than 480 languages, libraries enjoy a 95% hit rate for finding the records they need, collectively saving millions of hours of work each year. And it's not just catalogers who benefit from this scale: Interlibrary loan and reference desk staff also easily find the resources their users need in libraries worldwide.

FASTER ACCESS TO E-RESOURCES

The OCLC Cataloging and Metadata Subscription frees your staff from constantly checking for record updates or making the same manual enhancements that other libraries have already made. You get automatic updates every time the OCLC expert community improves one of your e-resource records, well beyond a minimal CIP update. And when publishers change URLs or titles in e-collections, your catalog stays up to date.

A VOICE FOR THE FUTURE

Working with libraries and other partners, we create powerful, collaborative solutions utilizing comprehensive metadata. We're uniquely positioned to work across standards bodies, publishers, search engines, and others on behalf of all libraries.

Together, we develop strategies, conduct research, and test prototypes to show the relationships among bibliographic details in WorldCat and beyond. The future of metadata management will build on the data in WorldCat, so when you catalog with OCLC, you join thousands of global libraries advancing together.

Develop quality records, boost efficiency, and amplify your library's impact, all with your OCLC Cataloging and Metadata Subscription.

Cooperative expertise drives quality

Describe the scholarly and cultural record through the global library catalog.

- **Create new, original records in WorldCat** to optimize discovery of your unique electronic and print titles and to surface hidden collections.
- **Enrich bibliographic data** about all types of resources for the benefit of the OCLC community.
- **Connect data across cultures** and languages with integrated authority files.
- **Drive the development of new standards** that increase access to the world's knowledge.

WorldCat grew by more than **40,000,000 original records** between July 2024-June 2025.

NEXT STEPS WITH LINKED DATA

We understand our responsibility to help each library proceed at their own pace, based on their own needs and resources. With WorldCat as the foundation, our long-term strategy focuses on expertise, data, infrastructure, and tools.

Learn more at oclc.org/linkedata.

Metadata automation increases efficiency

Simplify cumbersome metadata management processes.

- **Deliver the latest electronic resources** to students and faculty with automated holdings feeds from many major e-content providers.
- **Get shelf-ready print material** in your catalog and out to users quickly.
- **Support a range of purchasing models**, including demand-driven acquisition.
- **Keep your catalog current** with ongoing, automatic updates to high-quality MARC records.

OCLC automates record delivery from more than **700 content providers**.

VENDOR-NEUTRAL PARTNERSHIPS

We partner with content providers--including Wiley, Elsevier, ProQuest, EBSCO, Springer Nature, Sage, Oxford University Press, and more--to automate electronic and print collection management. And we're regularly adding new partners to increase efficiencies for libraries.

Data registration expands impact

Connect your collection to others and enhance the services your library offers.

- **Register your holdings** when you copy catalog new titles and improve your local catalog with the high-quality metadata in WorldCat.
- **Help students, researchers, and librarians** find your complete collection as well as relevant open content.
- **Enhance the collective collection** by registering your shared print commitments in WorldCat.
- **Enable functionality in your other OCLC services**, such as FirstSearch and interlibrary loan.

Copy cataloging via
WorldCat saves libraries
millions of collective hours
of work each year.

SHARED COLLECTION MANAGEMENT

Plan for the future with WorldCat's shared print registration. We enable the registration of print serials as well as single- and multi-part monographs, help group leaders register commitments on behalf of participating libraries, and make shared print commitment data available to inform library decisions.

"9,000 other catalogers ..."

"Records through WorldCat updates have the wonderful effect of making it appear like 9,000 other catalogers are working just for you."

Becky Culbertson

Electronic Resources Cataloging Librarian
Shared Cataloging Program, California Digital
LibraryCalifornia, United States

The California Digital Library's Shared Cataloging Program centralizes bibliographic record maintenance for consortially licensed and open-access serials, databases, and monographs. Becky relies on tools included with her OCLC Cataloging and Metadata Subscription, to provide the highest-quality and most up-to-date records possible to the ten University of California campuses. In WorldCat, Becky updates vendor records with the information she has for the benefit of other libraries worldwide. In return, she benefits from other catalogers' work to enhance WorldCat records by adding subject headings and ISSN information. "It reflects the cooperative cataloging spirit that we all need and depend on," she said. And it's only possible with WorldCat.

Unique in scale, **unparalleled in quality**

WorldCat makes global library collaboration possible on a scale unimaginable without it and forms the foundation for many OCLC services. Your collections in WorldCat power your library and connect you to the world.

To make your collections visible and accessible. You need the high-quality metadata in WorldCat.

You need metadata that keeps up with evolving standards to deliver on researchers' expectations, metadata that can inform collection development decisions, and metadata that supports discovery, interlibrary loan, and the other services your library offers.

Our professional catalogers and data specialists, as well as library staff worldwide, continuously enhance WorldCat records. Students and faculty always access the best bibliographic information possible, no matter how popular or obscure the resource.

These same high-quality records also power other OCLC services, like WorldCat Discovery and FirstSearch®. And through participation in OCLC's web visibility program (oclc.org/visibility) your collection appears on websites, search engines, and campus management portals where people look first for information. Because you have your holdings in WorldCat, students and faculty can find what they need even before they consider visiting the library.

When researchers from other institutions request resources your library owns, interlibrary loan staff members rely on WorldCat holdings to help them fulfill their requests. With up-to-date holdings in WorldCat, your library can easily lend your resources to support learning and understanding well beyond your campus.

OCLC improves WorldCat every day.

What's included to support all your metadata management needs

The tools in your OCLC Cataloging and Metadata Subscription evolve to keep up with staff and user expectations. Do more with your metadata so students and researchers can do more with your electronic and print materials.

Metadata automation tools

Add, update, and manage the electronic and print collections in your catalog with WorldShare Collection Manager so your users can find and access the information they need.

- **WorldCat updates**
- **WorldCat knowledge base collections**
- **WorldCat cataloging partner collections** automatically output WorldCat records that match your print orders from partner providers.
- **WorldCat query collections** support expert searches to extract records from WorldCat.
- **WorldCat data sync collections** let you bulk register all your holdings in WorldCat.

Original cataloging tools

Create new WorldCat records one at a time for print and electronic items to make your library's rare and distinctive items discoverable. Save time by enriching and sharing existing records, setting and deleting your library's holdings, and exporting WorldCat records for local use.

Choose the service that best meets the needs of your unique library. **WorldShare Record Manager** is built on the global WorldShare Platform, and **Connexion**[®] is available as a Windows-based client. Both support advanced, personalized workflows and allow you to easily share work, data, and resources with other libraries and OCLC applications.

CUSTOM SOLUTIONS

Your subscription also provides access to APIs and the Z39.50 protocol to support the processes that work best for your unique library.
