Search tips

Multiple words: When you enter more than one word, for example, **yosemite muir roosevelt**, descriptions will match if they contain all of your words.

Find a phrase: To find a phrase, enter your terms within double quotes. For example, **"harlem renaissance"**.

Find words near each other: To find matches when your search terms are near one another, put your words in quotes and follow with a tilde "~" and a number indicating how far apart the matching words can be. This technique is known as a proximity search. For example, to find the words "john" and "booth" within a span of four words, **"john booth"~4**.

ArchiveGrid is an important destination for searching through historical documents, personal papers, and family histories held in archives around the world.

Thousands of libraries, museums, and archives have contributed nearly a million collection descriptions to ArchiveGrid. Researchers searching ArchiveGrid can learn about the many items in each of these collections, contact archives to arrange a visit to examine materials, and order copies.
