

IPRES 2012

Preservation Health Check: discussion

Workshop 4
PREMIS implementation fair 2012

Titia van der Werf

Senior Program Officer
OCLC

Discussion

- **Practical questions** (PHC-project; methodology)
- **Risks:** relationship with TRAC/DRAMBORA/etc. frameworks? Potential for automating PHCs and making it a routine. Need to put the PHC-exercise in bigger picture of risk assessment.
- **Impact:** how would the results of the project impact our organization (in developing preservation strategies; in becoming a trusted repository; in providing input to justify the development of health check tools)?

Discussion

- **Policies:** policies are essential for establishing context to risk assessment => there is a relationship between policies/metadata/risk factors. How will the SPOT-PREMIS mapping take policies into account?
- **Digital lifecycle and control over metadata:** Metadata might be produced by other stakeholders in the digital lifecycle. The PHC-pilot might need to take the lifecycle into account when mapping metadata and threats.
